

Custom Palette Database Documentation

Export:

Export "PaletteData.asset" by right click and Export Package:

Note: you do not need any dependencies as they will be included in any asset you wish to import this to.

Import:

"PaletteData.asset" to this folder directory:

Assets/SmiteSoft/Colorize Palette Modifier/Scripts/Editor/EditorResources/CustomPalette/

Note: you can only have one Custom Palette Database, meaning you would have to delete any other database found in this directory before importing
